

Lanzarote, Spain

Basics

Thematics

Project: Sea Center in Punta Mujeres

Designer: Silvia Álvarez Ferri. silviaaf@coac.net
2007

The project emerge over a old layout of salt mines in the coast of Punta Mujeres, Lanzarote.

The building look for new relations with the coast between the tides. The borders of the building want be blurred in the coast...

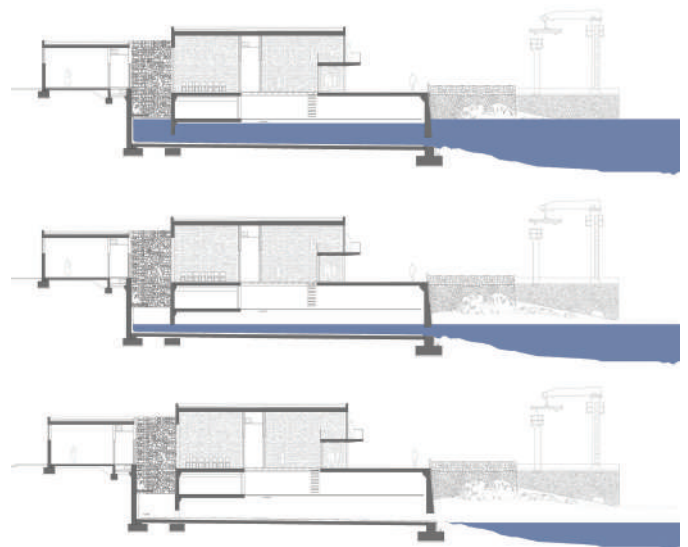

Several patios appear like 'evaporation areas' in the primitive salt mines, and the new interior spaces are planing around this patios.

This cavitys are connectings with the sea, and are flooded with the rise of the tides...

The tides keep the time inside the building.

'Bufadero': cavity in volcanic rocks. The primitive salt mine in Canary Islands.

'The coast like meeting point between the emerged and immersed land...a fragile border stretching, hiding behind the land, raising and sliding...this is the continuous change of the coast.'
